Acti-4STM Stainless Steel Co-Axial Wires

Acti-4STM Stainless Steel Co-axial wires are manufactured with the highest quality medical grade type **304VAR stainless steel**

Acti-4STM Stainless Steel Co-axial wires combine three important features making it the wire of choice for **initial leveling and aligning** where teeth are seriously malposed.

Acti-4STM Stainless Steel Co-axial wire are made using five strands of stainless steel wire wrapped around a stainless steel core wire. The wire **won't fray when cut**.

Acti-4STM Stainless Steel Co-axial wire's **wide working range** provides ability to move teeth without undue discomfort to patient. Large diameters can be used earlier in treatment to achieve control
