## RCS-NITINOL

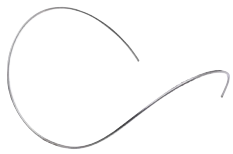

PREMIUM NITINOL

by Modern Orthodontics

Super Elastic or Thermal  
Laser Marked Midline  
Diamond Polished  
Constant Force

## TiNoI-RC<sup>TM</sup> Reverse Curve of Spee Nitinol

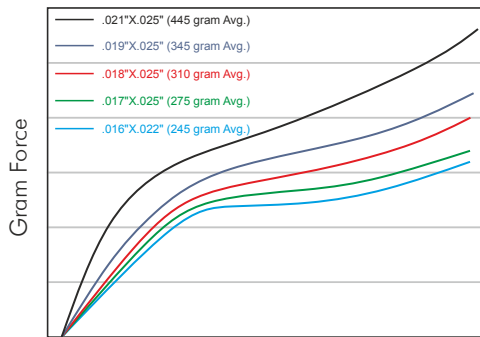

Forget about the frequent wire changes required because of bite opening bends being flattened by occlusal forces. Use our TiNoI-RC<sup>TM</sup> reverse curve of Spee archwires available in **both Super elastic and Thermal materials**.

TiNoI-RC<sup>TM</sup> wires are an excellent choice for leveling and bite opening. You can also **consolidate the spaces and close the bite** with these wires.

TiNoI-RC<sup>TM</sup> wires have **Ultra smooth finish** for more aesthetic value and minimum friction

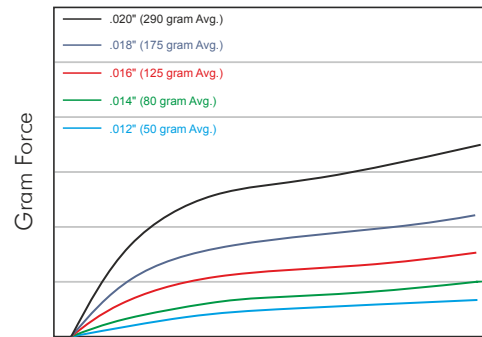

TiNoI-RC<sup>TM</sup> archwires are having distinct and **permanent etched markings** for midline. While upper arches have three midline marks, lower ones have one midline etch mark.
